(Circular, No. 6.)

WAR DEPARTMENT,

SURGEON GENERAL'S OFFICE,

WASHINGTON, D. C., *May* 9, 1867.

By authority of the Hon. Secretary of War the subjoined Supply Table is promulgated to the Medical Officers of the Army and will be in force from this date as the Standard.

J. K. BARNES,
Surgeon General, U. S. Army.

STANDARD SUPPLY TABLE

OF THE

MEDICAL DEPARTMENT

OF THE

UNITED STATES ARMY.

AUTHORIZED MAY 9, 1867.

ARMY MEDICAL LIBRARY
26 1840
WASHINGTON, D. C., U.S.

The Standard of medical and hospital supplies for the Army is the Supply Table. It is not the design of the Department to confine medical officers absolutely to that table, either in variety or quantity, but to establish a criterion for their guidance in making requisitions for supplies, leaving individual preferences to be indulged at the discretion of Medical Directors or the Surgeon General. Neither is it supposed that the quantities stated in the table will always meet the necessities caused by the prevalence of epidemics, or the location of troops in unhealthy parts of the country and medical officers who allow their supplies to be exhausted through such contingencies, without timely notice of their prospective needs, will be held to a strict accountability.

ARTICLES.	ALLOWANCE FOR THREE MONTHS— For General Hospitals. 100 Beds.	300 Beds.	500 Beds.	1,000 Beds.	For a Regiment or 1,000 Troops. At Permt Posts, including a Post Hosp. of 50 Beds.	In the Field.

ALLOWANCE OF SURGICAL INSTRUMENTS FOR MEDICAL OFFICERS.

PERSONAL SET.

FOR CAPITAL OPERATIONS.

- Two Amputating Knives, one long, one medium.
- Two Catlings, one long, one medium.
- One Cartilage Knife.
- One Bistoury, straight.
- Three Scalpels.
- One Capital Saw, long, bow, two blades.
- One Chain Saw.
- One Metacarpal Saw.
- One Hey's Saw.
- One Trephine, conical.
- One Trephine, small crown.
- One Razor, small.
- One Raspatory.
- One Elevator.
- One Brush.
- One Bone Forceps, Liston's, long, sharp, spring handle.
- One Bone Forceps, broad-edged, slightly curved, spring handle.
- One Bone Forceps, gnawing, spring handle.
- One Bone Forceps, sequestrum, spring handle.
- One Lithotomy Forceps.
- One Artery Forceps.
- One Artery Needle.
- One Artery Needle Key.
- Twelve Surgeon's Needles.
- Six Wire-Suture Needles.
- One Tourniquet, screw, with pad.
- One Tenaculum.
- One Scissors.
- One Chisel.
- One Gouge.
- One Trocar and Canula, straight.
- Four Drills, (with one handle.)
- Two Retractors.
- Twelve yards Suture Wire, silver.
- ¼ ounce Ligature Silk.
- ⅛ ounce Wax.
- One Mahogany Case, brass bound, slide catch.
- One Leather Pouch.

FOR MINOR OPERATIONS.

- One Amputating Knife.
- One Finger Knife.
- One Hernia Knife.
- Three Bistouries, one straight, one curved, one curved, probe pointed.
- Two Scalpels.
- One Artery Forceps.
- One Ball Forceps.
- One Dressing Forceps.
- One Dissection Forceps.
- One Œsophageal Forceps.
- One Artery Needle.
- One Artery Needle Key.
- Twelve Surgeon's Needles.
- Six Wire-Suture Needles.
- Two Scissors, one straight, one angular.
- One Tenaculum.
- One Trocar and Canula, curved.
- One Belloc's Canula.
- Two Tracheotomy Tubes, (double.)
- One Nelaton's Probe.
- One Director.
- One Cutting Pliers, small.
- One Wire Ecraseur.
- Two Grooved Staffs, medium and large.
- One Syme's Staff.
- One Sound, small, straight.
- Six Steel Bougies, silvered, double curve, Nos. 1 and 2, 3 and 4, 5 and 6, 7 and 8, 9 and 10, 11 and 12.
- Three Silver Catheters, Nos. 3, 6 and 9.
- Six Elastic Catheters, Nos. 1, 3, 5, 7, 9 and 11.
- One Prostate Catheter, silver.
- Twenty-four Suture Pins, silvered.
- Six yards Suture Wire, silvor.
- ¼ ounce Ligature Silk.
- ⅛ ounce Wax.
- Six Serre-fines.
- One Mahogany Case, brass bound, slide catch.
- One Leather Pouch.

FOR THE EYE AND EAR.

- One Anel's Syringe.
- One set Bowman's Probes and Dilators, silver.
- Two Styles, silver.
- One Cataract Knife, Beer's.
- Two Cataract Needles, one lance-headed.
- One Broad Needle.
- One Curette.
- One Cystotome.
- One Tyrrell's Hook.
- One Critchett's Spoon.
- One Speculum, Laurence's.
- One Iris Knife.
- One pair Iris Scissors.
- Two pairs Iris Forceps, one straight, one curved.
- One pair Cilia Forceps.
- One Sharp Hook.
- One Strabismus Hook.
- One pair Scissors, straight.
- One pair Scissors, curved on the flat.
- One pair Scissors, strabismus.
- Six Needles, fine.
- ⅛ ounce Silk, fine.
- One yard Silver Suture Wire, fine.
- One set Test Types, Snellen's.
- One Scoop and Hook, for removing foreign bodies from the Eye and Ear.
- One pair Forceps, angular, for removing foreign bodies from the Ear, Wilde's.

FOR THE EYE AND EAR.—*Continued.*

One Eustachian Catheter.
One set Ear Specula, Wilde's or Toynbee's.
One Ophthalmoscope.
Two Laryngeal Mirrors, one square, one elliptical, with Reflector.
One scruple of Sulphate of Atropia, (in g. s. bottle.)
Two scruples of Alcoholic Extract of Calabar Bean, (in g. s. bottle.)
One Mahogany Case, brass bound, slide catch.
One Leather Pouch.

FOR THE POCKET CASE.

One Scalpel.
Three Bistouries, one straight, one curved, one curved, probe pointed.
One Tenotome.
One Thumb Lancet.
One Artery Forceps.
One Dressing Forceps.
One Artery Needle.
Six Surgeon's Needles.
Three Wire-Suture Needles.
One Exploring Needle.
One Tenaculum.
One Scissors.
One Director.
One Probe.
One Nelaton's Probe.
One Caustic Holder.
One Silver Catheter, compound.
Six yards Suture Wire, silver.
¼ ounce Ligature Silk.
⅛ ounce Wax.
One Russia Leather Case.

FOR LOCAL ANÆSTHESIA, DIAGNOSIS, ETC.

One Nebulizer, Richardson's—with Two Tubes, one single—one double.
One Medical Thermometer.
One Urinometer.
Litmus Paper—red, 6 sheets—blue, 6 sheets.
One Hypodermic Syringe, 3 points.
One Mahogany Case, brass bound, slide catch.
One Leather Pouch.

ONE LEATHER TRUNK FOR THE SET.

INSTRUMENTS FOR SERVICE IN THE FIELD.

FOR THE FIELD CASE.

Two Amputating Knives, one long, one medium.
Two Catlings, one long, one medium.
Two Scalpels.
Three Bistouries, one straight, one curved, one curved, probe pointed.
One Hernia Knife.
One Finger Knife.
One Capital Saw, long, bow, two blades.
One Chain saw.
One Metacarpal Saw.
One Hey's Saw.
One Trephine, conical.
One Razor, small.
One Raspatory.
One Elevator.
One Brush.
One Bone Forceps, broad edged, slightly curved, spring handle.
One Bone Forceps, sequestrum, spring handle.
One Artery Forceps.
One Ball Forceps.
One Dressing Forceps.
One Dissection Forceps.
One Artery Needle.
One Artery Needle Key.
Twelve Surgeon's Needles.
Six Wire-Suture Needles.
One Tourniquet, screw, with pad.
One Tenaculum.
Two Scissors, one straight, one angular.
Two Retractors.
One Trocar and Canula, curved.
One Nelaton's Probe.
One Director.
Six Steel Bougies, silvered, double curve, Nos. 1 and 2, 3 and 4, 5 and 6, 7 and 8, 9 and 10, 11 and 12.
Three Silver Catheters, Nos. 3, 6 and 9.
Six Elastic Catheters, Nos. 1, 3, 5, 7, 9 and 11.
Six yards Suture Wire, silver.
4 ounces Ligature Silk.
½ ounce Wax.
One Mahogany Case, brass bound, slide catch
One Leather Pouch.

FOR THE POCKET CASE.

One Scalpel.
Three Bistouries, one straight, one curved, one curved, probe pointed.
One Tenotome.
One Thumb Lancet.
One Artery Forceps.
One Dressing Forceps.
One Artery Needle.

FOR THE POCKET CASE.—*Continued.*

Six Surgeon's Needles.
Three Wire-Suture Needles.
One Exploring Needle.
One Tenaculum.

JOS. K. BARNES,
Surgeon General, U. S. Army.

NOTES.

1. The materials for preparing CHLORINIUM are a Sulphuric Acid Mixture and a Common Salt Mixture.

The Sulphuric Acid Mixture.

Take of Sulphuric Acid—S. G. 1.845.....45 parts.
Water.....21 parts.

Mix them carefully, and when cold put the mixture into strong bottles with accurately ground stoppers—each bottle containing sixty-five fluid ounces.

Half a fluid ounce of this should be used for each package of the Common Salt Mixture.

The Common Salt Mixture.

Take of Common Salt, well dried.....1800 parts.
Binoxide of Manganese, containing 72 per cent.....1875 parts.

Grind them together into a fine powder, put the powder up in packages containing about 195 grains each, and put 130 of these packages in a pasteboard box to accompany the Sulphuric Acid Mixture.

Each of these packages requires half a fluid ounce of the Sulphuric Acid Mixture, and yields about 57 cubic inches of Chlorine. This quantity, when thus liberated gradually in a space containing about 20,000 times its volume of air, is usually borne without inconvenience and is not injurious even in pulmonary diseases. As very much depends upon the ventilation of the apartments in which the chlorine is to be used, no absolute rules of application can be laid down, except that it should never be used in such quantities as to produce discomfort or bronchial irritation.

DIRECTIONS FOR USE.

One of the packages of the Common Salt Mixture placed in a saucer or plate and thoroughly mixed with half a fluid ounce of the Sulphuric Acid Mixture, is to be placed under every alternate bed at night and allowed to remain there three days. Upon the second night the beds which were omitted on the first night should be supplied in the same way and for the same length of time and the whole process repeated at the end of three days, or sooner, according to circumstances. Should the wards be badly ventilated, or contain many sloughing wounds, or be subject to epidemic disease, or to low forms of fever, the process should be continuous—that is, the mixtures should be renewed on every third day. Otherwise, once or twice a month may be sufficient. And when thorough cleanliness and ventilation shall have been attained, the process will be unnecessary for occupied wards.

In disinfecting unoccupied wards, water closets, latrines, etc. with Chlorine, they should be first cleansed, be closed up as perfectly as practicable and two packages or more used for each 600 cubic feet of space.

2. Vaccine Virus is to be procured by application to Medical Directors of Departments. Medical Directors will obtain it by requisition upon the Surgeon General.

3. Medicine Wagons will be distributed as the Surgeon General shall direct.

4. The "Cough Mixture" consists of Syrup of Squills and Camphorated Tincture of Opium, each four fluid ounces, with two fluid drachms of Fluid Extract of Ipecacuanha. The dose is one teaspoonful.

5. The "Liniment" is prepared with equal parts of Water of Ammonia, Oil of Turpentine, and Olive Oil.
